[How to calculate linear range and LOD from fluorescence sensitivity](#) ...

The linear range can be measured simply by making a plot of analyte concentration versus fluorescence, using evenly-spaced analyte concentrations, and seeing at what concentration the data deviate from a straight line that is tangent to the low end of the concentration range.

[How to calculate linear range and LOD from fluorescence sensitivity](#) ...

[Determind the linear range is relatively easy, and can be achieved by taking a sample and performing a serial dilution](#). If the ranges overlap then determining the amount of sample to load is also similarly easy.

[Linear range of detection and what it means for your quantifications](#)
