Ed A Nobel Prize in Physics for his rework on quanta? Einstein is considered that founder of quantum theory because he described light as photons in his theory of the photoelectric effect; for which he won a 1921 Nobel Prize. Einstein's theory of relativity and quantum mechanics are among his most famous contributions. He also developed the Bohr model of the atom and the theory of Brownian motion.

IBM has recently established its global leader in intentional products selected (no included values) Tj T* BT /F
