<p></p><p>The TL;DR version of this review is: surprising light
t, extremely pocketable, does the job, not my dream charger but at 👍 the
e price it is well worth it.</p>
<p>We've covered a product of Lepow's before, the Moonstone. Like the Moonstone,
the Poki comes 👍 with a cloth carrying case that you can stash a
USB cable in (it appears to come with a 6 👍 USB-> MicroUSB,) or chuck
your ID and credit card in and use it as a wallet while you're out. It's
28077; actually the first thing that stood out when I was looking at the device.
. The Moonstone is still going strong 👍 with a friend of mine a year later.</p>
<p>The battery delivers a 90% conversion efficiency rating according to specs
on the 👍 manufacturer's website. Most batteries go from the high 70
s to mid 80 s. You want to see a higher number as 👍 this is how much power
gets delivered with the rest being lost in conversion.</p>
<p>The Poki can charge and recharge at 👍 2.1amps. This means you're
not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you
should 👍 be able to charge this in under five hours and with 90% conversion
efficiency you should have around 9000mAh of 👍 actual juice to spare.
That should be enough for at least three complete charges from dead to full
for any 👍 smartphone on the market today.</p>
<p>2.1 amp charging also means you're not going to spend ~7 hours charging
a 3000mA phone 👍 from dead, more like an hour and a half if your phone
supports it.charging that fast.</p>
